Training Program on **ADVANCES IN MOBILE APPLICATION DEVELOPMENT**

(Online Mode)

August 03-07, 2026.

Programme Directors

Dr N. Srinivasa Rao

Dr P.D. Sreekanth

Dr. Srinivasa Rao

ICAR-National Academy of Agricultural Management (NAARM), Hyderabad announces a training programme on "Advances in mobile application development" from August 03-2026. The training will be conducted in online mode.

Background

The agricultural sector has reaped major benefits from increased usage of information and communication technologies (ICTs). According to studies, ICTs can significantly improve farmers access to agricultural information and extension services. It is clear that ICTs have the ability to enable farmers access to and exchange of information for decision-making. Web applications and mobile applications are becoming more popular among ICTs, and they are transforming the agricultural communication process. These include access to crop information, research data, real-time meteorological data, warnings, best rates for seeds and fertilizers, market information, agriculture education, advising and other services, and so on in the agriculture industry. These applications provide a number of advantages, including ease of use, affordability, voice communication, and quick and convenient service delivery, among others.

Keeping in view of advances in agricultural communication process, this training programme is being organized for the benefit of bringing awareness and building necessary skills in mobile application development among the staff of NARES

Objective

- To expose the awareness among the participants about the advances in mobile application development
- To educate the participants in various existing and advanced software tools for mobile application development
